

## Churches, Schools & Gymnasiums

There are a wide variety of needs for function and design in churches, schools & recreational buildings. Our customers tell us major concerns are maintenance, initial cost, and specific space requirements.

Whether you need a large clear span gymnasium, an efficiently spaced church or an expansion for your classroom, Capital Steel is ready to help. Our buildings are designed with economy and flexibility as top priorities. When you need to expand, you'll be happy you picked Capital Steel since expandability is a built-in feature. Capital Steel systems offer substantial savings when compared to ordinary construction methods. Enjoy faster construction time, low maintenance cost, and durability. Energy efficient Capital Steel buildings offer lower heating and cooling costs.

Column-free interiors offer uninterrupted floor space and provide high ceilings. Stucco, Rock and Brick products designed to be used with steel buildings offer a custom look at an affordable cost without requiring increased engineering expense.
