## New Jersey

### Incentives/Policies for Renewables & Efficiency

#### WARMAvantage Program

Last DSIRE Review: 02/11/2010

#### Program Overview:

<b>State:</b>	New Jersey
<b>Incentive Type:</b>	State Rebate Program
<b>Eligible Efficiency Technologies:</b>	Water Heaters, Furnaces , Boilers
<b>Applicable Sectors:</b>	Residential
<b>Amount:</b>	<b>Eligible Natural Gas Customers:</b> Furnace: \$300 Furnace w/ECM: \$400 Boiler: \$300 Domestic Hot Water Heater: \$25 or \$300 (varies by efficiency)
<b>Equipment Requirements:</b>	<b>Oil or Propane Users:</b> Furnace (gas or oil): \$300 Boiler (gas or oil): \$300 Gas Storage Water Heater: \$25 Gas Tankless Water Heater: \$300 <b>Eligible Natural Gas Customers:</b> Furnace: 92% AFUE or greater, Energy Star Furnace w/ECM: 92% AFUE or greater, Energy Star Boiler: 85% AFUE or greater Domestic Water Heater: 0.62 EF (lower incentive) or 0.82 EF (higher incentive) <b>Oil or Propane Users:</b> Gas Furnace: 92% AFUE or greater, Energy Star Oil Furnace: 85% AFUE or greater, Energy Star Boiler (oil or gas): 85% AFUE or greater, Energy Star Storage Water Heater: 0.62 EF or greater, Energy Star Tankless Water Heater: 0.82 EF or greater, Energy Star
<b>Funding Source:</b>	New Jersey Societal Benefits Charge; ARRA
<b>Program Budget:</b>	\$20.2 million (2010 for WarmAdvantage and CoolAdvantage combined)
<b>Web Site:</b>	<a href="http://www.njcleanenergy.com/html/1residentialia...">http://www.njcleanenergy.com/html/1residentialia...</a>

#### Summary:

**Note: This program is generally limited to natural gas customers of participating utilities; however, for a limited time during 2010 (effective February 1, 2010) the program will also offer incentives to residential customers that use oil or propane heating systems. This limited time program expansion is made possible by funding from the American Recovery and Reinvestment Act (ARRA) for the State Energy Efficient Appliance Program.**

#### Natural Gas

The WARMAvantage Program's objective is to improve the energy efficiency of space-heating systems and water heaters. The N.J. Clean Energy Program offers rebates on furnaces, boilers and water heaters. Furnaces and boilers can qualify for incentives of \$300 to \$400, depending on level of efficiency. A water heater with an Energy Factor of 0.62 or greater can qualify for a \$25 rebate while a water heater with an EF of 0.82 or higher qualifies for a \$300 rebate. The incentive levels listed here are valid for equipment purchased on or after April 1, 2009.

In order to be eligible for this program, applicants must be current residential gas customers of Elizabethtown Gas, New Jersey Natural Gas, Public Service Electric and Gas, or South Jersey Gas. Several of these utilities also offer supplemental incentives for residential space and water heating applications. Those participating in the New Jersey Energy Star Home New Construction Program are not eligible to apply. Installations in newly constructed homes are only eligible if the home is in the Smart Growth Area.

**Oil or Propane**

Effective February 1, 2010, customers that use propane or oil for space-heating and water heating are eligible for incentives under terms similar to those offered to eligible natural gas customers. In order to qualify for incentives new boilers, furnaces, and water heaters must meet the minimum program efficiency requirements and replace an appliance in an existing New Jersey home. Appliances installed in new construction are not eligible for incentives.
